

By selecting Wackenhut to provide you with Business Continuity Services, your company will be better prepared to manage and recover from crisis incidents.

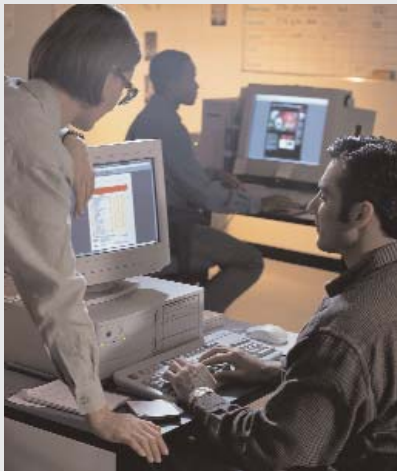

Sixty-six percent of executive-level managers surveyed lost at least a full business day due to the August 2003 blackout, and 24 percent lost more than \$50,000 per hour of downtime-meaning at least \$400,000 for an 8-hour day.

Mirifex, The Center for Regional Economic Issues and CrainTech Survey of Executive-level Managers in States affected by August 2003 blackout

Up to a third of companies have not tested their disaster recovery systems within the last year.

WACKENHUT'S BUSINESS CONTINUITY SERVICES

The ability to effectively respond to and manage the consequences of an event in a timely manner is essential to ensure an organization's survivability in today's fast paced business environment. With the emergence of new threats, such as cyber-terrorism and bio-terrorism; and the increasing exposure of companies to traditional threats such as, fraud, systems failure, fire, explosions, spills, natural disasters, etc. an "integrated" approach to Business Continuity Planning is essential.

The consequences for a disruptive event, like the ones named above, can be fatal to your organization.

Many organizations have now made business continuity planning a top priority. The Wackenhut Corporation in conjunction with Logical Management Systems, Corp. can assist your business in taking all the right initiatives to assure the survival, growth and resilience of your corporation.

Our Business Continuity Services include:

- **Strategic Readiness Assessment**
- **Business Continuity Planning**
 - **Training, Drills, and Exercises**
 - **Commitment Identification and Tracking**

The goal of any organization is to assure its operational integrity. The following are key components of Wackenhut's comprehensive service strategy:

Only a minority of organizations ensure that all staff are aware of the existence of a business continuity plan and their role in an invocation, but a plan is useless unless the people who will make it work understand how to act under emergency conditions.

David Honour, Editor, GlobalContinuity.com

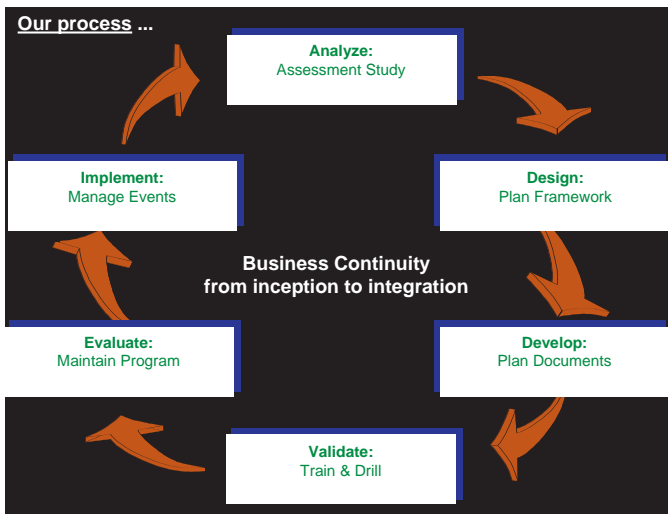

Strategic Readiness Assessment

What keeps you awake at night? What would be the three most devastating surprises for your company? What business are you in today? In six months, what business will your customers want you to be in? In 12 months, what business will your customers demand that you be in? Where's your next event coming from? Today you cannot merely think about the plannable or plan for the unthinkable, you must learn to think about the unplannable. It's all about getting enough bits and pieces in place so as to transform chaos into recognizable patterns - Because decision-makers need to know what questions to ask.

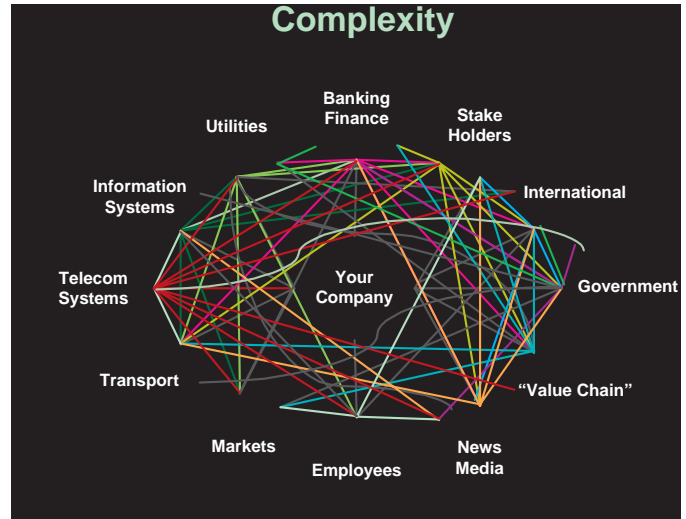

A team of continuity specialists implements our Strategic Readiness Assessment to examine your organization's business continuity state of readiness. Nine Essential Elements of Analysis for integrated business continuity are assessed in the thorough, six-stage audit.

- Vulnerability Identification and Control
- Continuity Strategy and Approach
- Organization: Roles, Responsibility, Structure
- Documentation: Policy, Plans, Procedures
- Resource Development
- Continuity Maintenance

Business Continuity Planning Strategy

Are you solving the wrong problem precisely?

Ask Yourself?

- Are our operations 24 X 7?
- How would our image be affected by an interruption?
- Have we set operational tolerances?
- How well do we monitor business processes?
- Have our systems changed recently?
- How are we affected by eCommerce?
- Do we outsource?
- How effective is our Event Management Program?
- Is our DRP and/or BCP up to date?
- Have we merged or acquired other entities?
- Can our value chain recover from a disruption?
- What is our vulnerability exposure?
- What is our consequence tolerance level?
