

NUCLEAR ACCESS AUTHORIZATION

PROVIDING VITAL SERVICES TO THE NUCLEAR INDUSTRY FOR OVER 20 YEARS

Nuclear power plants are crucial to the infrastructure of the United States. In an age when threats of terrorism are ever-present and the integrity of nuclear utilities' security programs are constantly in the spotlight, it is more important than ever for them to ensure that the quality of their access authorization program is beyond reproach.

Industry Intelligence reveals that there is no other company offering a solution to the current mandates of access authorization screening on a volume response basis. The access authorization screening industry has been void of a substantive provider having the resources in place to deliver what is required.

WACKENHUT HAS RESPONDED.

With a proud 20-year history of providing services to the nuclear industry, Wackenhut understands the demands on the industry for specialized access authorization.

Drawing on our extensive expertise, Wackenhut has made significant investments in leading edge technology to ensure accurate and timely results while still remaining cost-effective. With the latest technology, process capability and senior management team with unrivaled experience in access authorization investigations, Wackenhut is dedicated to providing the nuclear industry with a level of service that is second to none.

WHY WACKENHUT, FOR NUCLE

1. INNOVATIVE PROCESS

The heart of the access authorization process is the Personal History Questionnaire (PHQ). A standard PHQ runs 20-30 pages and can take up to 50 minutes to complete data entry into the production system.

Utilizing the most unique and advanced form and character recognition engines, Wackenhut worked with leading experts to address these problems. The new process not only ensures accurate and swift research, but it is simple. Clients fill out the forms and send them to us via fax, email or mail. Once received, our system routes the images through a high-speed reader and permanently stores the PHQs. Verifiers then go through the highlighted sections (fields recognized that need more input) of the PHQ to make sure every field is complete and accurate. This technology allows a PHQ to go through the quality assurance process and be transmitted to our system in 5 to 7 minutes. Work begins immediately, having a very positive effect on turn-around times.

2. TIMELY TURNAROUND

Prompt turnaround time is one of the most important aspects of an access authorization background program. Wackenhut investigators are trained specialists in fact-finding techniques to create thorough reports in an efficient manner. Automated systems are employed to ensure optimum time service.

What this means to you!

In a random selection of over 5,000 PHQs, Wackenhut completed 98% within four (4) days or less and 94% within three (3) days or less. See chart at left for comprehensive results.

3. STATE-OF-THE-ART WEB BASED REPORTING

While the research is on going, Wackenhut wanted to ensure that our clients could view the results or status in real-time. Wackenhut's innovative web-based reporting enables customers to retrieve results or check the status of an investigation through a secure Internet connection. Reports on subjects with potentially derogatory information will be "flagged" to assist in the adjudication process. For those elements that are complete, clients can click on those directly to review the research results even before the entire report is complete. Not only that, but clients even have immediate access to original PHQs and supporting documents 24 hours a day, seven days a week.

Potential derogatory information

AR ACCESS AUTHORIZATION?

4. COMPLIANT WITH ALL FEDERAL AND STATE REQUIREMENTS

Wackenhut conducts its access authorization background investigations in full compliance with the new NEI Guidelines, the Code of Federal Regulations (CFR-10) part 26, and all other applicable federal and state statutes.

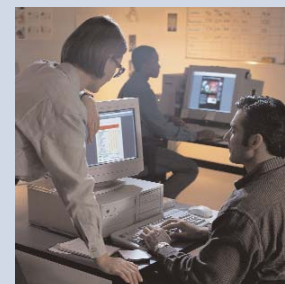

5. LIVE AGENT CUSTOMER SUPPORT

Customer service and support is available 24 hours a day, seven days a week to assist with any questions or concerns.

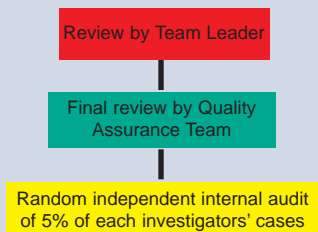

6. QUALIFIED INVESTIGATORS

Wackenhut Investigators are duly licensed pursuant to the requirements of the state law and NRC regulations. Along with meeting the minimum licensing requirements for private investigators, they also must meet the the following requirements: Bachelor Degree or equivalent experience, successful completion of an intensive training program, drug screen and full background investigation.

Levels of Quality Assurance

7. QUALITY ASSURANCE WITH ACCURATE, RELIABLE RESULTS

A successful access authorization background investigation must be accurate and reliable. Wackenhut's commitment to quality service is evident by our dedicated quality assurance staff and internal audit processes. To ensure quality and regulatory compliance, Wackenhut employs three levels of quality assurance (see list at left).

8. INNOVATIVE PRICING CONCEPTS

Wackenhut's pricing model gives nuclear utilities a break from expensive flat rate pricing.

What this means to you!

In a random selection of over 5,000 PHQs, the average number of elements for an initial PHQ was 12.22. Our average billing for these Initial PHQs was \$147.43, a notable pricing difference from our competitors.

What you can save per PHQ with Wackenhut's Access Authorization service.

PHQ Type	Flat Rate Pricing from Industry Competition	Average Amount billed by Wackenhut*	Savings per PHQ
Initial	\$350.00	\$147.43	\$202.57
Update	\$250.00	\$142.60	\$107.40
Reinstate	\$150.00	\$44.57	\$105.43

* Based on a random sample of over 5,000 PHQs.

9. CREDITED FOR MULTIPLE ELEMENTS COMPLETED IN ONE (1) CONTACT

Wackenhut clients will be credited for multiple elements if we are able to complete more than one (1) element for a subject in one (1) contact. For example: The subject was employed by the same company several times during the period of investigation.

What this means to you!

During a recent outage period, Wackenhut clients received over 3800 elements at no charge!

10. RECENT AUDIT RESULTS

An NEI audit team conducted an audit for compliance to NEI 03-01, 10CFR73.56 at Wackenhut's facility. We are proud to report that the audit found the Wackenhut Program to be *effectively implemented*, and found no findings or deficiencies requiring any follow-up or corrective action.
